compatible w/ Quickbooks
compatible w/ Excel
compatible w/ Google Sheets

Cube

Overview
- 1.) Basic information
- 2.) Integration
- 3.) Pricing
- 4.) Support

1.) Basic information

- FP&A: Financial Planning & Analysis: Telling a story w/ the past on what happened & tell a story in the future (what do you plan to happen? what might happen) Tell you a story in the present

- Comment Cube: Took the FP&A essentials & paired it w/ excel.
  - Picked Excel instead of building a spreadsheet
  - Usually, you manually put data in spreadsheet & make changes.
  - Cube creates structure to put in the cloud.
  - Platform
    - Backend & database structured in cloud.
    - Right level of access control (either)
    - → into Cube and pull data into source system so we have universal connector w/ platforms you use to manipulate → one truth (possibly 1 sheet info)

Cube Analytics

- Go to excel & type in any dimensions & pull data from cube into spreadsheet.

Cube reads rows & numbers

06/03/2025

only in excel

saved state

Excel: Draft screen & publish anything = Cube will give an audit trail tell you what the difference is. → Track who made what change.
→ Exchange rates.
→ Gene a better understanding of VA & NB.

Team Structure
- Small companies = Pretty small

Questions
Can I continue a conversation w/ you?
We are an accounting firm we QuickBooks → Excel → Determine information / modifying formulas.
We want a template w/ required formulas.
Can it do it from Excel / QuickBooks.
