Case studies

Great if you
- care about custom form & branding
- Budget vs Actual comp
- serve clients who want clean reports but not visual dashboards

Integration: w/ Quickbooks, Xero, Google Sheets, Microsoft Excel

What is Reach reporting good @?

Known for being: Reporting, Planning, Consolidation, Communi
- Multi-business consolidation: multi entities & currencies
- Cash Flow Planning - 3 way budgeting
- Client info: Centralize all your files

1.) Fully customizable Reports
2.) Reusable templates
3.) Quickbooks D+O + Excel integration
4.) Forecast + Budgets
5.) Custom calculations

Can Reach Calculate Custom Metrics?
- Reach Reporting has a formula builder
- You can insert non-fine data (sqft) & use in calculations

Reach Reporting is cloud based

Reach Reporting demo : June 18 @ 11am Demo

What's the catch?

- Not a visual dashboard-focused
- Learning curve for adv formatting
- Feels like Excel
- Fewer built-in insights (Doesn't auto analyze your data like syft or Fath)
- Doesn't do Profit & Loss by job

What do Reach Reporting dashboards do?

- More functional than flashy
- Used to track metrics such as Rev, Exp, Net profit, Budget vs Actual
- You can include KPI's on your dashboard
- Dashboards are client-facing and can be white-labeled.

Should you consider Reach?

Yes if

- You want full control over the layout and branding of your reports
- Need to manage many clients reports fast
- Want to calculate custom KPI's, bud, fore
- Care more about clarity than visual dash

Compatible w/ Quickbooks Desktop Enterprise

- Integrates w/ Quickbooks via
- Stmts: (autopopulates your data into pre-built stmts) easy for customiz
- Sheets: Pull live data & build custom formulas that update automatically

Budgets: Quickly create budgets that you can + to any report or dashboard.

Google Sheets: combine non-fin & operational data w/ QBD for deeper insights.
