1.) Power Query + Excel

- How it saves time
  - You export your data once (as CSV or Excel from Quickbooks Desktop)
  - Use Power Query to pull in that file.
  - Power Query cleans, reshapes, & automates everything.
  - Your dashboard & formulas never break again.
  - Next time? Drop in new data → Click "Refresh all"

→ Setup Time = 2-4 hours

= Ongoing work: 5-10 minutes per project.

Cost: Free
